    <meta name="viewport" content="width=device-width, initial-scale=1.0">
    <title>RegisteredUser</title>
```

```
</head>
<body>
    <table border="1" cellpadding="8">
        <thead>
            <tr>
                <th>Name</th>
                <th>Email</th>
                <th>Password</th>
            </tr>
        </thead>
        <tbody id="userTable">
            <!-- rows will be added here -->
        </tbody>
    </table>
    <script>
    let users = JSON.parse(localStorage.getItem("users")) || [];
    let tableBody = document.getElementById("userTable");
    users.forEach(user => {
        let row = `
            <tr>
                <td>${user.name}</td>
                <td>${user.email}</td>
                <td>${user.password}</td>
            </tr>
        `;
        tableBody.innerHTML += row;
       });
    </script>
</body>
</html>
```

- **script.js**

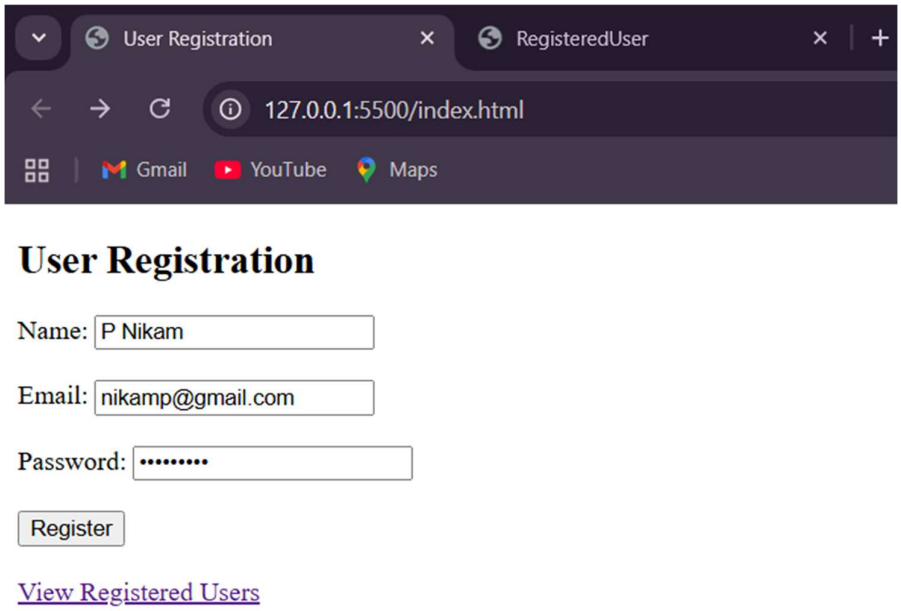
```
document.getElementById("regForm").addEventListener("submit", function(e){
    e.preventDefault();

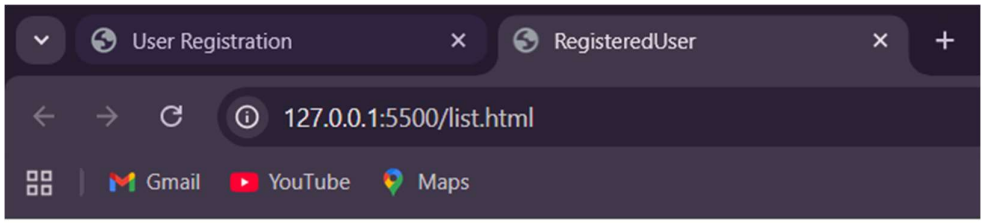
    let name = document.getElementById("name").value;
    let email = document.getElementById("email").value;
    let password = document.getElementById("password").value;
    let userData={
        name: name,
        email: email,
        password: password
    };
    let users = JSON.parse(localStorage.getItem("users")) || [];
    let xhr = new XMLHttpRequest();

    xhr.open("POST", "dummyURL",true);
    xhr.setRequestHeader("Content-Type","application/json");

    xhr.onload = function (){
        users.push(userData);
        localStorage.setItem("users", JSON.stringify(users));
        window.open("list.html", "_blank");
    };
    xhr.send(JSON.stringify(userData));
});
```

- **Output:**





Name	Email	Password
Gauri Mawal	gaurimawal0305@gmail.com	123654
Mansi Mahanor	manumahanor@gmail.com	147852
P Nikam	nikamp@gmail.com	nikam@123
